

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

-----X
RICHARD A. WILLIAMSON,

Plaintiff,

-v-

No. 11 Civ. 4948 (LTS)(HBP)

VERIZON COMMUNICATIONS INC., et al.,

Defendants.
-----X

ORDER

The Markman hearing previously scheduled for Monday, November 5, 2012, is adjourned to **Monday, December 10, 2012 at 9:30 a.m.** Each side (i.e. Plaintiff's counsel, on the one hand, and counsel for the AT&T and Verizon parties, on the other) will be allotted one hour and fifteen minutes in total for opening and closing statements and any tutorial. Each side will be allotted up to fifteen minutes of argument on each disputed term. In the course of their term-related arguments, the parties are invited to address the following alternative constructions, which seem to the Court warranted on the basis of the intrinsic evidence.

Term	Plaintiff's Proposed Construction	Defendants' Proposed Construction	Court's Proposed Alternative Construction
Provide a first level of caching [of the/for/of/of general] content	Providing a first storage location for content located between the second storage location and the end-user system	Providing storage for content pulled from a regional server in response to a request by an end-user system	Providing a storage location for content associated with a sub-region or local area
Provide a second level of caching [of the/for/of/of	Providing a second storage location for content located	Providing storage for content pulled from a remote server in	Providing a storage location for content associated with the

general] content	between the high-speed backbone and the first storage location	response to a request by a caching server	regional server
Multicasting	The delivery of information from a single source to multiple destinations	Transmitting a single copy of data from a source to multiple destinations that requested the data	The delivery of content from a single source to multiple destinations, where only a single copy of the particular content passes over any network link
Destination Address	An identifier for an intended recipient to which data are to be delivered	Address identifying requesting end-user systems	Address identifying network location from which multicast content is delivered to end-users
Content is replicated amongst the regional servers	Content is copied to the regional servers	Content is copied from one regional server to another regional server	Content is copied onto multiple regional servers
Group of [the] end]- user systems	Set of recipients intended to receive specified content	End-user systems that requested the content	End-user systems that requested or otherwise subscribed to the content
Content	Information, such as text, audio and video	Public network-accessible files	Information, such as text, audio and video, in the form of files or in other forms

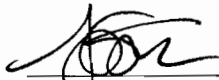

The Court will not require further live expert testimony.

The Court will approve a technology order permitting up to three attorneys for Plaintiff and up to two attorneys for each defendant group to bring in a laptop each, and the peripheral equipment specified in the proposed order previously submitted by Plaintiff's counsel. Good cause must be shown in writing for any request for approval of additional equipment. If

projectors, screens, or any other audiovisual equipment are required, the Courtroom Deputy must be notified of the need no later than November 30, 2012.

SO ORDERED.

Dated: New York, New York
November 13, 2012

LAURA TAYLOR SWAIN
United States District Judge
